

ELSEWHERE 4-SONG CASSETTE

- BROODING
- SIGNS OF LIFE
- ANOTHER DAY, ANOTHER LOSS
- OUTBOUND

The self proclaimed "progressive punk" sounds of Elsewhere are more often the culmination of past influences rather than pioneering creations. Green Day and others are weaved throughout the fabrics of Elsewhere except in the advanced potentials of, "Signs of Life." Now this is a progressive song but not necessarily even in the realms of punk. So, does the band sound good? Sure they do, even if they aren't exactly what you would call a punk band. But who cares about categories anyway? Personally, I hate them.
